

Public Disclosure Requirements – Net Stable Funds Ratio

The qualitative and quantitative public disclosures under this section have been prepared in accordance with the Central Bank of Kuwait (CBK) Rules and Regulations concerning Net Stable Funds Ratio for Islamic Banks licensed in the State of Kuwait, vide circular reference (2/IBS /357/2015) dated 25/10/2015.

Qualitative disclosure on NSFR

The purpose of the Net Stable Funding Ratio (“NSFR”) is to ensure that banks hold a minimum amount of stable funding based on the liquidity characteristics of their assets and activities over a one year horizon. The objective is to reduce maturity mismatches between the asset and liability items on the balance sheet and thereby reduce funding risk.

The minimum requirement on NSFR is defined as follows

$$\frac{\text{Available Amount of Stable Funding}}{\text{Required Amount of Stable Funding}} \geq 100 \%$$

“Stable funding” is defined as those types and amounts of equity and liability financing expected to be reliable sources of funds over a one-year time horizon under conditions of extended stress. The amount of Available Stable Funding (ASF) is measured based on the broad characteristics of the relative stability of the bank’s funding sources, including the contractual maturity of its liabilities and the differences in the likelihood of different types of funding providers to withdraw their funding. The amount of Required Stable Funding (RSF) is measured based on the broad characteristics of the liquidity risk profile of the bank’s assets and Off Balance Sheet exposures. Assets that are more liquid and more readily available to act as a source of extended liquidity in the stressed environment identified above receive lower RSF factors (and require less stable funding) than assets considered less liquid in such circumstances and, therefore, require more stable funding.

Warba Bank’s strategy has been to ensure that there is adequate available stable funding to match its required stable funding at all times. In ensuring this the Bank has focused on increasing its funding from long term sources. The Bank also accessed Syndicated borrowing of USD 400 Million of almost 3 years tenor to improve its overall NSFR.

As of 31 December 2018 the bank’s NSFR was at 111.03 % compared to the minimum requirement of 100%.The total ASF after assigning weights (ASF Factors) was KD 1,391 Million while the RSF after applying weights was KD 1,253 Million.
